

*Hauling up  
the "MAKINGS"  
of an ENTIRE  
ROOF or TWO*

This block weighing about five (5) tons, contains enough slate to roof an entire house. It is one of the reasons for the good quality and low price of "Pennsylvania Slate Institute Standard" slate (see back cover). Few quarries, aside from those members of the Pennsylvania Slate Institute, have the quality of rock or cleavage to make possible the handling of such enormous blocks.

**SLATE RIPPERS, SLATE CUTTERS, SLATE HAMMERS, LADDER HOOKS, SLATER'S STAKES, COPPER NAILS, SOLDER BARS, SNOW GUARDS, SNOW RAILS, SOLDER IRONS, SLATE HOOKS, STAINLESS NAILS, COPPER RIVETS, SLATE ROOF BIBLE, TOOL SETS, CHICKEN LADDERS.**

**THE SLATE ROOFING CONTRACTORS ASSOCIATION OF NORTH AMERICA, INC.** (SlateRoofers.org), installed this Buckingham slate roof on a picnic pavilion in a city park last year (2009) in Frankfort, KY. We told them that the water was supposed to flow on TOP of the roof, but they wouldn't listen to us and you can now see the unfortunate results. We knew the fine Buckingham slates, donated by the Buckingham Slate Company in Arvon, VA (BVSSlate.com) would hold up for more than a century if the water was coming from above, but we didn't know what would happen if the water was coming from below. Last we heard, the building was still standing and *trying* to keep what's under it dry... Photo by Patrick Kennedy

**HERE'S SOMETHING YOU DON'T SEE EVERY DAY** — A standard thickness slate roof with each course bedded in cement to create a thick, textured look. This 80-year-old roof in New Haven, Connecticut, is being referred to as a "Cotswald" roof by the owner. No doubt the folks in the Cotswolds in England would dispute this claim. Cotswold stone is a yellow limestone quarried throughout the Cotswold in the UK. The stone is one of the most beautiful and durable roofing materials to be found anywhere in the world.
